Step 1: Create a directory

mkdir ~/Downloads/ucanaccess
cd ~/Downloads/ucanaccess

Step 2: Download the required JAR files

Download the UCanAccess driver and its dependencies.

wget https://repo1.maven.org/maven2/io/github/spannm/ucanaccess/5.1.3/ucanaccess-5.1.3.jar

wget https://repo1.maven.org/maven2/io/github/spannm/jackcess/4.0.8/jackcess-4.0.8.jar

wget https://repo1.maven.org/maven2/org/apache/commons/commons-lang3/3.17.0/commons-lang3-3.17.0.jar

wget https://repo1.maven.org/maven2/commons-logging/commons-logging/1.3.5/commons-logging-1.3.5.jar

wget https://repo1.maven.org/maven2/org/hsqldb/hsqldb/2.7.4/hsqldb-2.7.4.jar

Verify the downloaded files.

ls

Expected output:

commons-lang3-3.17.0.jar
commons-logging-1.3.5.jar
hsqldb-2.7.4.jar
jackcess-4.0.8.jar
ucanaccess-5.1.3.jar

Step 3: Create the Access database

Create a Microsoft Access database named

Database1.accdb

Step 4: Create the Java program

nano AccessDemo.java

Paste the following program.

```
import java.sql.*;

public class AccessDemo {

   public static void main(String[] args) {

      try {

         String url =
         "jdbc:ucanaccess:///home/student/Downloads/ucanaccess/Database1.accdb";

         Connection con = DriverManager.getConnection(url);
```

```
            System.out.println("Connected Successfully");

            Statement st = con.createStatement();

            ResultSet rs = st.executeQuery("SELECT * FROM student");

            while (rs.next()) {

               System.out.println(
                  rs.getInt("ID") + " " +
                  rs.getString("NAME") + " " +
                  rs.getInt("MARKS"));

            }

            con.close();

         } catch (Exception e) {

            e.printStackTrace();

         }

      }

}
```

Save the file.

- Press **Ctrl + O**
- Press **Enter**
- Press **Ctrl + X**
- **Step 5: Compile the Java program**

```
javac AccessDemo.java
```

If there are no errors, the file

```
AccessDemo.class
```

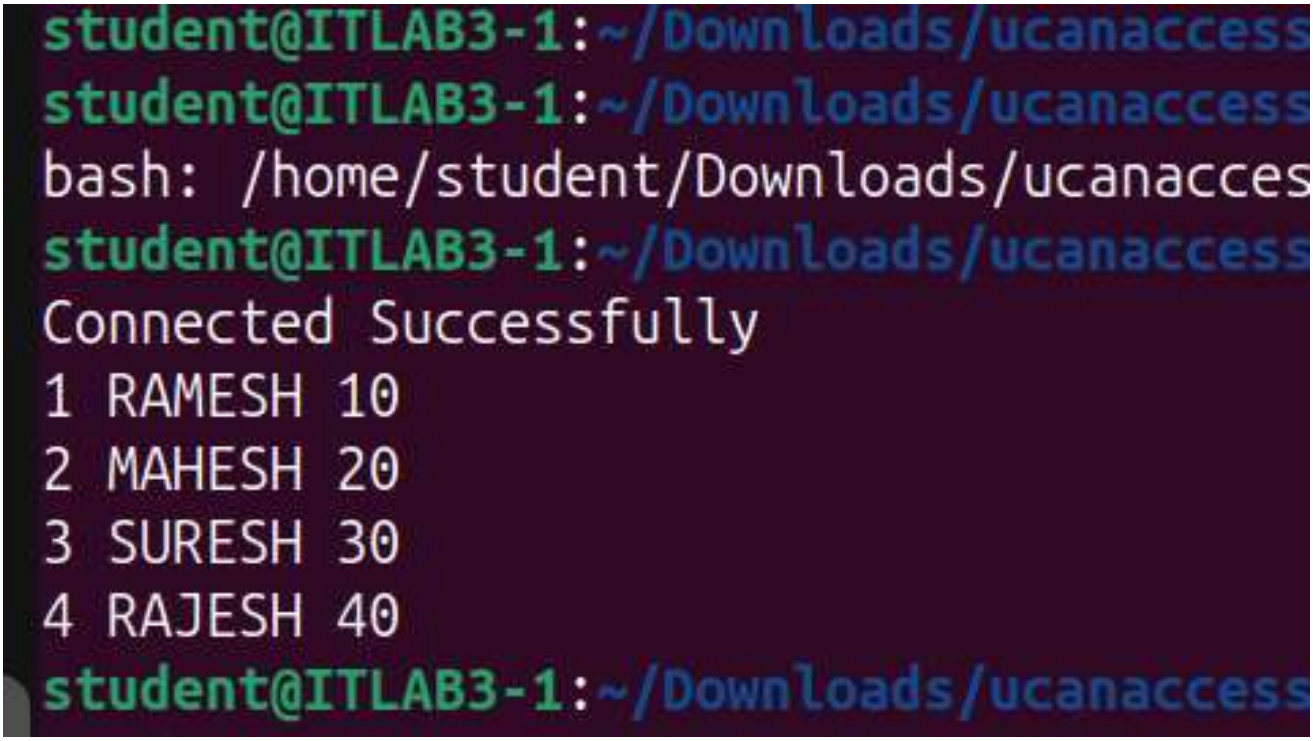

will be created.

Step 6: Run the program

Since you are using **UCanAccess 5.1.3**, specify all the required JAR files in the classpath.

```
java -cp ".:ucanaccess-5.1.3.jar:jackcess-4.0.8.jar:commons-lang3-3.17.0.jar:commons-logging-1.3.5.jar:hsqldb-2.7.4.jar" AccessDemo
```

Step 7: Output

student@ITLAB3-1:~/Downloads/ucanaccess
student@ITLAB3-1:~/Downloads/ucanaccess
bash: /home/student/Downloads/ucanacces
student@ITLAB3-1:~/Downloads/ucanaccess
